

VIAIR GOES PORTABLE

■ Viair has just released new automatic portable air compressors: the 400P-A and 450P-A. The new air compressors offer automatic shutoff that simplifies tire filling in a revolutionary way. Rather than rushing from the tire back to the compressor to shut it off, all you have to do is let the compressor run. The automatic function of the compressors will turn the unit on and off for you while you move from tire to tire. This is especially useful for applications where compressor speed and long run time are desirable.

Both units are capable of 150-psi maximum working pressure and come with their own gas-station-style tire-inflation gun with high-performance air-pressure gauge on board. Additionally, the 400P-A and 450P-A portables come with heavy-duty battery-connection cables, an inflation-tips kit, heavy-duty sand tray with rubber overmold, and a heavy-duty carrying bag for added portability.

A LITTLE CAN GO A LONG WAY

■ For those of us who aren't looking for coilovers and 40-inch tires, Daystar Products is pleased to announce the release of its new 1-inch body-mount kit for the new Jeep JK Wrangler. The kit is ready for installation on 2WD and 4WD models and also on both two-door and four-door vehicles. There is no welding or drilling required to install — simply put each bushing between the designated factory body mounts and vehicle frame, keeping the vehicle's body accurately centered on the frame. The kit comes complete with all necessary hardware.

For more information, contact: Daystar Products Int., (800) 595-7659, www.daystarweb.com.

DONAHOE RACING VENTURES INTO JEEP TERRITORY

■ Famous for its desert racing suspension systems, Donahoe Racing has now entered Jeep territory with its new '07 Jeep JK suspension. This kit has been designed with desert-racing toughness in mind. The new system includes 2-inch-thick link arms with on-vehicle adjustment capability and Panhard bars and is available with Donahoe Racing 2-inch Signature Series shocks or 2.5-inch ZooRoad shocks also built custom by DR. The kit also includes a tie-rod flip kit for greater steering angles, uses optimum stock pivot-point geometry, and is available in 2-, 4-, and 6-inch lift heights.
