Best-Selling Daystar Lift & Leveling Kits Now Available in Camouflage

Daystar Products, a leading manufacturer of Lift & leveling Kits for trucks and SUVs, now offers many of its popular suspension products in a unique camouflage finish. These distinctive new accessories allow enthusiasts to customize the undercarriage of their vehicles with no hassle and with no impact on ride quality.

Daystar's new Camouflage Lift & Leveling Kits are available for several popular Dodge, Ford, and Jeep applications. These spacer kits feature a "natural" camouflage finish that is perfect for any outdoorsman. These spacers feature the same great functionality as the rest of Daystar's product line, but with the added benefit of a "custom" camouflage look.

Daystar offers the largest line of Lift & Leveling Kits in the industry, with over 350 applications available. What sets Daystar's product line apart from others is the use of Polyurethane components rather than steel or aluminum. With Polyurethane there is no metal-on-metal contact and it also enhances the NVH (Noise, Vibration and Harmonics) canceling characteristics of the suspension. Daystar Lift & leveling Kits work within the factory suspension design to provide extra room for a larger tire and wheel package without compromising ride quality, handling, or load-carrying capacity. With strut applications, Daystar's Top-Mount Easy-Install Design does not preload the coil springs (which degrades ride quality) or require disassembly of the factory struts. All of Daystar's Lift & leveling kits are manufactured in the USA and come with a Lifetime Warranty.

Combine Daystar's Camouflage Lift & Leveling kits with Daystar's new Scorpion Performance Shock Absorbers (also available in camouflage) for the ultimate suspension package that is equally at home on the pavement or off road. For more information on Daystar's Camouflage product lines, go to www.daystarweb.com or call 800-595-7659.
